

Towards a safer world

**WHEN YOU GO IN HARM'S WAY,
YOU WANT THE BEST TECHNOLOGY ON YOUR SIDE.**

The threat could be round the next corner, over the next hill or far away. Our family of unmanned air systems provide responsive, persistent real-time situation awareness across the battlefield, disseminating intelligence, surveillance and reconnaissance to ensure that the warfighter is fully aware of what lies ahead. These scaled solutions, spanning mini, micro and tactical UAS, share a common control station that fuses sensor data into a single networked picture for operators and commanders on the ground.

Delivering decisive battlespace awareness. Tomorrow's technology is here today.
