

SELEX Galileo showcases Key Products at 2008 AUSA Exposition

SELEX Galileo, of Finmeccanica, will take part in the 2008 Association of the United States Army (AUSA) exposition held in Washington DC 6 – 8 October 2008.

SELEX Galileo is a world leader in the field of Defence Electronics and will exhibit some key technologies at the exposition.

At the 2008 AUSA expo SELEX Galileo will showcase the following technologies:

- **ECLIPSE** (Economic Compact Lightweight Pointer Tracker System), a lightweight, low cost, low power pointer tracker providing DIRCM capability for Rotary Wing Platforms.
- **PicoSAR** Compact Lightweight Ground Surveillance Radar
- **PicoSTAR** (Surveillance, Targeting And Reconnaissance) integrated multi-sensor payload which uses PicoSAR Active Electronically Scanned Array (AESA) ground moving-target indicator/synthetic aperture radar (SAR) as a base.
- **AGP** Aircraft Gateway Processor, a state of the art Defensive Aid System Controller (DASC) derived from the successful HIDAS system fitted to the UK and other nations Apache helicopters.
- **EziView**, under armour compact vision system which enables real-time images from thermal and daylight sensors.
- **LINAPS**, Artillery Pointing System currently in operation with the British Army 105mm Light Gun.
- **Harrier Medium Wave Infrared Detector**
- **Hawk Medium Wave Infrared Detector**
- **Condor II Dual Wave Infrared Detector**
- **Merlin Medium Wave Infrared Detector**
- **LINX** - day/night observation and targeting system binocular. A multifunctional Day/Night Hand Held Target Locator which includes an uncooled thermal imager for all weather observation and detection.
- **ASPIS** - multifunctional light integrated rifle sight. ASPIS is the next generation of multifunctional integrated Rifle-Sight. Compact and one of the lightest available.
- **SCORPIO** - light weight FCS for grenade launcher. SCORPIO is a lightweight compact Fire Control System for Grenade Launcher tubes that provides a quickly and accurate aiming and firing.
- **NIMOS** is a light weight helmet mounted display and comms Modular lightweight Helmet Mounted Display integrated with Low Light Level digital TV for soldier night mobility.

LINX, ASPIS, SCORPIO and NIMOS have been delivered to the Italian Army as part of their 'Soldato Del Futuro' (Future Soldier) programme. These products have attracted great International interest as well as interest in the UK.

SELEX S&AS (US) Inc is a wholly owned subsidiary of SELEX S&AS Ltd, a Finmeccanica company. SELEX S&AS Inc operates under a Special Security Agreement (SSA) granted by the US Defence Security Services for a company under foreign (non-US) ownership.
